Caesarstone® London Grey™

Product Comparisons	Aesthetics	Technical Properties	Warranties & Protection	Maintenance & Repairs	Range & Variety
	Whilst made from natural quartz materials, quality control processes mean that Caesarstone® slabs have a very consistent dispersion of chip (pattern) and colour variation.	In tests of flexural strength, impact strength, and water absorption, Caesarstone came out the clear winner against natural stone.	10 year warranty on Caesarstone products, backed up by Fletcher Building, largest building products company in NZ. National Technical support for all Caesarstone products.	Caesarstone does not require sealing. Surface damage can sometimes be repaired by a trained Caesarstone fabricator.	Available in a wide range of colours and patterns, in 20mm and 30mm thicknesses.
	While being based off natural stone, each sheet of laminate has the same pattern giving greater consistency. Benchtops will be much closer to samples.	Is non-porous, very good resistance to staining.	7 year warranty on Formica and Laminex products, backed up by the largest building products company in NZ. National Technical support for all Formica & Laminex products.		Wider range of stone and other patterns in Gloss and Matt finishes.
Engineered Stone Brands	Composite material made of crushed stone bound together typically with a resin.	Strong, usually backed by multiple lab tests to demonstrate features such as stain resistance	Supplier product warranty available		Normally available in a standard range of colours and thicknesses. Ask for more details
Natural Stone (Marble & Granite)	Each slab is unique, and has variations in colour, shade and grain. This means that actual benchtops may vary from samples.	Natural Stone is a beautiful product but may be porous, especially marble, therefore requires sealing.	Supplier product warranty on natural stone.	Regular cleaning and sealing is required to keep natural stone looking good.	

 caesarstone®

Surfaces For Your Home

Combining the beauty and strength of quartz – one of nature's strongest minerals – Caesarstone® quartz surfaces retain the cool, tactile qualities of natural stone yet are resistant to stains, scratches and are easy to clean.

With so many stunning designs to choose from, there's always a Caesarstone® surface for your kitchen, bathroom and more.

Choose Caesarstone®

Our surfaces consist of up to 93 percent quartz which is stronger than natural stone and one of nature's hardest minerals. Caesarstone® surfaces are resistant to stains, scratches, cracks, heat and common household chemicals.

Non-porous, waterproof, mould and mildew resistant, Caesarstone® quartz surfaces are ideal for numerous applications. Large slabs provide a sleek and modern aesthetic, minimising joins and therefore maintenance.

Insist on the original quartz surface

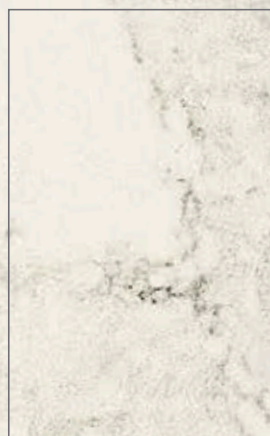

- ✓ Scratch and stain resistant
- ✓ Waterproof - never requires sealing
- ✓ Heat resistant
- ✓ Superior strength and flexibility
- ✓ Mould and mildew resistant
- ✓ Resistant to most household chemicals, acids and oils
- ✓ 10 Year Limited Warranty
- ✓ Complies with GREENGUARD's stringent indoor air emission standards
- ✓ Compliance with NSF 51, the international Health and Safety Foundation sanitary standard

Create Your Dream Space

Whether you're designing a kitchen, bathroom or commercial space, our online photo gallery and Visualiser tool are an ideal way to explore different colour ideas, refine your style choices and share your design online.

Use our online Find a Display locator to discover Caesarstone® displays at kitchen showrooms in your area, then email or SMS yourself directions.

Edge Profiles

Caesarstone® recommends a minimum radius of 3-4mm on any edge detail for optimal strength and durability. There are many edge profiles to choose from, including single thickness 20mm or 30mm slabs, through to laminated double thickness edge options.

Standard Pencil Edge
with 3-4mm Radius

Mitred
Apron

10 Year Limited Warranty

Caesarstone® quartz surfaces come with a 10 Year Limited Warranty. After installation you will receive your complimentary Caesarstone® Cleaning Kit. Each Caesarstone® slab is stamped on the underside with unique identification information establishing authenticity.

High Style, Low Maintenance

Caesarstone's polished quartz surfaces never need sealing and require very little maintenance to keep them looking like new. The hard, non-porous surface makes cleaning simple. In most cases, soap and water or a mild detergent are all that are required to maintain its lustre. Please understand that the concrete finish will require more daily care and maintenance than our polished finish.

It is also important to understand that like all materials dark colours show marks and smears more readily than light colours.

For extra-stubborn spills we recommend using Caesarstone® Cream Cleanser, which is detailed in our Care and Maintenance guide.

Wall Linings

Non-porous, waterproof, mould and mildew resistant, Caesarstone® quartz surfaces are ideal for kitchen splashbacks and bathroom wall linings. Large slabs provide a sleek and modern aesthetic, minimising joins and maintenance.

LAMINATE COLOUR RANGE

FORMICA®

The variety and durability of Formica® laminate makes it suitable for all lifestyles. Whether a family with young children sharing meals at the breakfast bar or a couple entertaining in their kitchen, laminate can create the look you desire with all of the added benefits of a softer, warmer and long-lasting material.

Stylish, durable and easy to clean, Formica® is the perfect solution for surfaces and benchtops, in both commercial and residential spaces. Available in a range of finishes, Formica® offers you the variety needed to help personalise your space.

Backed by a seven year limited warranty, Formica® laminate, a trusted household name for over 100 years, gives you complete confidence when it comes to choosing laminate.

Laminate.
your space. your style™

Finishes

Formica® Velour is a matt finish that delivers a clean and modern look. The most popular finish in the Formica® range, Velour is suitable for all situations.

Formica® Etchings is a dynamic surface featuring a softly polished and textured feel. Achieved through gentle accents of dappled highlights and tiny fractures, it is reminiscent of the finish found in natural stones and granite.

Formica® laminate is no different from any other material in that darker colours, gloss and semi-gloss finishes, such as AR Plus, GlossPlus or Etchings will show scratches and superficial wear and tear more readily than lighter colours or lower gloss finishes.

Formica® Honed features a low sheen satin finish, with subtle surface clefts and crevices that mimic softly brushed stone.

Formica® Riverwash™ Low-lustre Riverwash™ lends its soft patina and dual gloss texture to quartzstone and granite patterns, as well as designs inspired by man-made materials.

Formica® Naturelle™ Clean and simple, our Naturelle™ finish has a dry-wax appearance and an embossed “ticking” texture that imparts a realistic grain effect. Naturelle is ideal for any surface where you desire the character of wood, but need the easy-care attributes of laminate. Recommended for light-duty horizontal and vertical interior applications.

Formica® AR Plus® (GlossPlus®) is a superior high gloss finish. With greater abrasion and scuff resistance, horizontal surfaces will maintain their shine over standard gloss laminates.

Protec+[®]

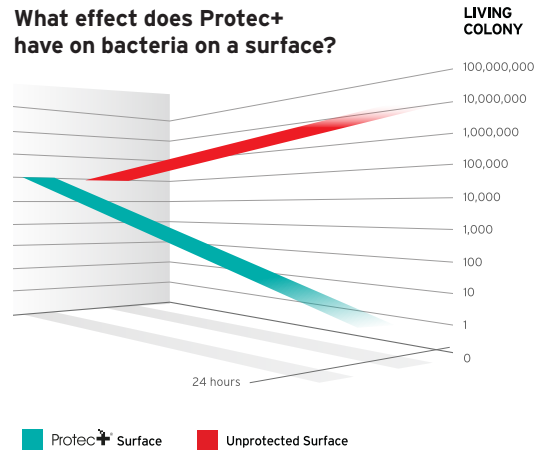

Antimicrobial laminates

More than ever people are looking for ways to fight the spread of germs, with one of their biggest concerns being clean surfaces. Whether in the home or in public spaces such as hospitals, schools, sports clubs and shopping centres, Formica[®] Protec+[®] antimicrobial laminate provides an innovative surface that inhibits the growth of bacteria and fungi.

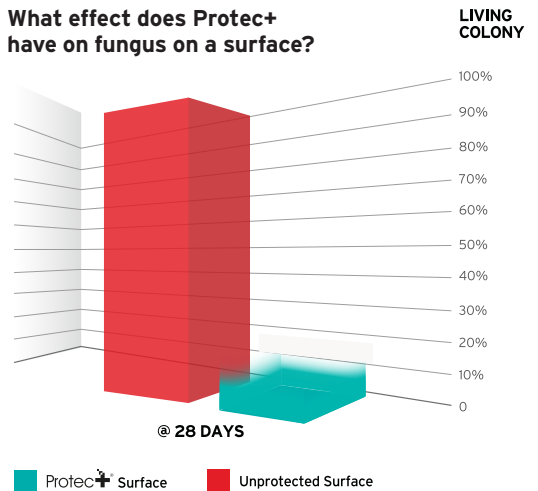

- ✓ Food safe
- ✓ Independently tested for antibacterial and antifungal efficiency in accordance with ISO22196:2011, JIS Z2801 and ASTM G21
- ✓ Available in selected colours, please refer to the Formica[®] laminate availability guide for details.

What effect does Protec+ have on bacteria on a surface?

What effect does Protec+ have on fungus on a surface?

Laminate as a splashback

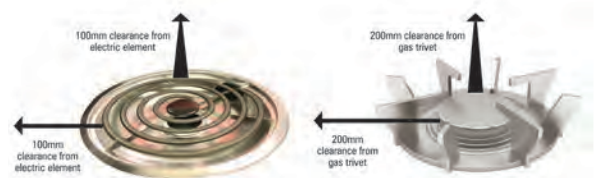

The variety and durability of laminate makes it suitable for many applications including splashbacks. It's stylish, durable, easy to clean and offers you the variety needed to help personalise your space.

A highly cost effective solution for splashbacks, laminate is available in a wide variety of decors, colours, patterns and finishes.

-  Durable; scratch, stain and wear resistant
-  Water resistant
-  Easy to clean
-  7 year warranty

Note: 1. All gas appliance installations must comply with AS/NZS S601.1: Gas Installations. 2. All electric cook top installations must be in accordance with the cook top manufacturer's instructions.

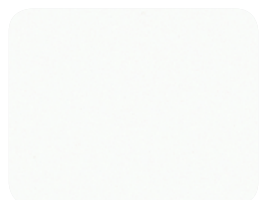

Splashback compliance. Formica[®] laminate is suitable to use as a splashback behind electric and gas cook tops. The following distances must be adhered to:

Electric cook top: Formica[®] laminate can be used as a splashback material behind an electric cook top provided that it is kept at a distance of at least 100mm from the periphery of the nearest heating element.

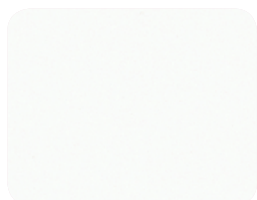

Gas cook top: Formica[®] laminate can be used as a splashback material behind a gas cook top provided that it is kept at a distance of at least 200mm from the periphery of the nearest gas ring.

Popular benchtop profiles

Rolled edge. Formica® laminate can be rolled to a minimum radius of 8mm for solid colours and 4.5mm for stones, abstract patterns and woodgrains*. The tighter radius for stone patterns allows for a similar look and finish to a stone benchtop. Popular for kitchen benchtops, a rolled edge provides a clean, consistent look with no joins, is cost effective, and extremely hardwearing with good chip and impact resistance. It is also ideal for environments where pointed edges need to be avoided or impact with the body might occur.

Square edge is made by clashing the benchtop edge with a piece of the same laminate to create a true square edge. A traditional Formica® laminate look, a dark line will be visible on lighter colours.

Acrylic edgetape is available to match selected colours from the Formica® 180fx® laminate range. Complimenting the high gloss stone decors, acrylic edgetape creates a greater depth of colour and with the décor being printed on the back of the edgetape protects the décor and colour on the edge from damage. The durable, sleek, square edge finish creates the realistic look of a stone slab at a fraction of the cost.

*Refer to availability guide for details on minimum radius for particular colours.

Square edge profile

Acrylic edgetape

FORMICA® Magnetic laminate

Get creative with interactive surfaces. Glossy White is an ideal whiteboard surface, while Matt Black is perfect as a chalkboard. Both laminates have an embedded metal foil layer that ensures magnetic objects will hold strongly to the laminate surface. Suitable for a variety of vertical applications, bring your surfaces to life with Formica® Magnetic laminate.

Formica® Matt Black Magnetic

Formica® Matt Black Magnetic

FORMICA® 180fx®

Formica® 180fx® laminate offers inspiration on a grand scale. Achieving an unprecedented large scale design, this sophisticated laminate replicates the beauty and magnitude of natural stone capturing every little nuance and detail.

Offering an unmatched realism, its striking colour variations and intricate veining deliver a unique, luxurious look that's perfect for residential and commercial benchtops, countertops and vertical applications.

Formica® 180fx® Soapstone Sequoia

Formica® 180fx® Carrera Marble

FORMICA® Metallic laminate

Metallic laminate combines the colour and character of real metals with the practical, flexible properties of laminate. Created as a texture on top of real metal foils, metallic laminates achieve a textile feel, with a crisp touch and low gloss sheen.

Part of the Formica® metallic range, Plex is a highly desirable and tactile laminate surface that exudes quality and helps achieve a fresh, timeless look. With a globally recognised Red Dot award for design, this cutting edge collection is perfect for innovative projects.

FORMICA® AR Plus® Solid Colours

Create visual impact with Formica® AR Plus® Solid Colours. These 1.2mm high gloss laminates deliver an exceptional flat gloss finish and depth of colour that is highly resistant to scuffs and abrasions.

Suitable for horizontal and vertical uses, Formica® AR Plus® can be used in applications such as benchtops, countertops, point of sale units, wall, door and cabinetry surfaces. Matching high gloss edgetape makes for a fantastic, high wear alternative to painted cabinetry.

FORMICA® ColorCore®

Create the seamless benchtop look with Formica® ColorCore® laminate. Featuring the high performance characteristics of Formica® laminate, ColorCore® has a solid coloured-through core which eliminates the dark line sometimes associated with laminate edges. With increased levels of wearability and reduced visual impact of chips and scratches, ColorCore® is ideal for applications such as benchtops, countertops, point of sale units, doors and work surfaces.

This brochure printed
using vegetable based
inks and environmentally
responsible papers.

The colours of the photographs and swatches depicted in this brochure are as close to the Formica® range as modern photographic, lighting and printing processes allow. The colour/finish combinations shown are available at the time of publication, but are subject to availability and may be withdrawn at any time. Note the swatches depicted are based on a 3600x1500mm sheet size. Actual sheet size is 3595x1395mm. Formica® 180fx® is no different from any other material in that darker colours, semi-gloss and gloss finishes will always show scratches and superficial wear and tear more readily than lighter colours or lower gloss finishes. Such surfaces require more care and maintenance and Laminex New Zealand recommends the use of laminate cleaning products (or mild household cleaning products). Please visit our website, formica.co.nz, for specific care and cleaning information. Note that in certain lights or from different angles wipe down marks may be visible after cleaning. Formica® 180fx® should be protected from strong direct sunlight as continuous exposure may cause discoloration or fading to the surface over time. Please obtain a copy of the terms and conditions of the Formica 7 Year Limited Warranty from Laminex New Zealand or visit formica.co.nz. This warranty is in addition to any rights that may exist under the Consumer Guarantees Act (1993).
